SUMMARY

Aspiring Full Stack Developer with a strong foundation in the MERN stack and currently pursuing a B.Tech in Computer Science (AKTU). Skilled in developing full-stack web applications, designing RESTful APIs, and creating responsive user interfaces. Proven ability to build and deliver end-to-end functional products. Seeking an SDE internship or entry-level role to apply technical skills and contribute to real-world engineering projects.

TECHNICAL SKILLS

Languages: Java, JavaScript

Frontend: HTML5, CSS, JAVASCRIPT, REACT.JS, Bootstrap, Tailwind CSS, SCSS

Backend: Node.js, Express.js

Database: MongoDB, SQL

Tools & Platforms: Git, GitHub, Postman, VS Code

Core Concepts: Data Structures & Algorithms (Java), Responsive Design

Other: RESTful APIs

EDUCATION

IIMT College of Engineering, AKTU

B.Tech in Computer Science and Engineering

Salwan Boys School (CBSE)

Class XII

Dolphin Public School (CBSE)

Class X

Greater Noida, UP

2023 – 2027

Delhi

2022

2020

PROJECTS

AI Mock Interview Platform | *React.js, Node.js, Express.js, MongoDB, SCSS* | **GitHub** | **Live Link**

- Developed a full-stack web application to simulate technical interviews, providing users with real-time AI-driven feedback and performance analytics.
- Architected scalable RESTful APIs and implemented secure JWT-based user authentication and data validation middlewares.
- Built a dynamic, mobile-responsive user interface using React.js and SCSS, leveraging the Context API for efficient global state management.
- Designed optimized MongoDB schemas to securely store user profiles, interview transcripts, and dynamically generated evaluation reports.

Zerodha Clone | *React.js, Node.js, Express.js, MongoDB, JWT* | **GitHub** | **Live Link**

- Engineered a full-stack trading platform clone replicating core Zerodha functionalities including secure user authentication with JWT and bcrypt.
- Developed a dynamic investment dashboard with a live-updating portfolio interface, delivering real-time holding and P&L visibility to end users.
- Architected a RESTful API backend using Express.js handling user sessions, portfolio data, and watchlist management backed by MongoDB.
- Implemented fully responsive UI with React.js ensuring a consistent cross-device experience across desktop and mobile viewports.

ACHIEVEMENTS

- Cleared the **internal selection round of Smart India Hackathon (SIH)** as part of a 6-member team for the project *“Real-Time Public Transport Tracking for Small Cities”*, addressing a live problem statement issued by the **Punjab State Government**.

CERTIFICATIONS

- **Getting Started with Artificial Intelligence** – IBM SkillsBuild
- **AWS Cloud Technical Essentials** – Amazon Web Services via Coursera
- **Generative AI: Introduction and Applications** – IBM via Coursera
- **Smart Embedded Systems & IoT** – IIMT College of Engineering & Technoledge Eduresearch Pvt. Ltd.
